Direction (Q. 1-5):

Read the following passage and answer these questions.

PASSAGE

Street theatre in India is a well-established ancient form of art, despite the proliferation of modern means of entertainment and communication it continues to flourish in India. Street theatre as a channel of communication has for centuries been propagating reforms by highlighting social, economic and political issues present in the society.

Unlike in the older days, its performance is no longer restricted to villages or small localities of the city. Today small groups of performers including students would give stage performance to mobilise public opinion or to help create or raise awareness over a particular issue of public importance.

Themes on substance abuse, AIDS awareness, domestic violence are some of the areas highlighted by contemporary street theatre groups. Unlike in regular drama, street drama employs very little props and images. Human body becomes the main tool in which choreography, dialogues, songs and slogans are extensively used.

It is one of the most intimate media. By being local and live it creates not only direct contact with the audience, but by being cost effective and flexible, it is popular among all age groups, as its appeal is to the emotions leading to quick psychological impact on audiences.

Direction (Q. 6-10) :

Read the following passage and answer these questions

Passage

Self-directed learning, in its broadest meaning, describes a process in which individuals take the initiative with or without the help of other, in diagnosing their learning needs, formulations of learning goals, identifying resources for learning, choosing and implementing learning strategies and evaluating learning outcomes. Thus it is important to attain new knowledge easily and skilfully for the rest of his/her life.

There are many reasons for self-directed learning. One reason is that there is convincing evidence that people, who take the initiative in learning, learn more things and learn better than people waiting to be taught. Secondly the self-directed learning is more in tune with our natural processes of psychological development; an essential aspect of maturing is developing the ability to take increasing responsibility of our own lives to become increasingly self-directed. The third reason is that many of the new developments in education put a heavy responsibility on the learners to take good deal of initiative in their own learning. To meet the challenges in today's instructive environment, self-directed learning is most essential.

Q. 6 In self-directed learning, an individual,

- 1) takes initiative with or without the help of others.

- 2) is passive and waits for directions.
- 3) is helpless and dependent.
- 4) takes initiative, without any purpose.
